

FOUND A TICK ON YOUR PET? WE WANT IT!

Our practice is participating in a study with the **British Columbia Centre for Disease Control**, in partnership with a leading animal health company, to see which ticks are in **our area**.

1

Remove the tick. Need help?
Scan this QR code

2

Bring it to our clinic

3

We will have the tick identified with the etick.ca platform and it may be tested to see if it could pose a disease risk

The results from this study will help us determine the best tick control strategy for pets in British Columbia!

**Thank you for your participation
in this important project!**
