# The Science of Relevant

Help get horses advanced protection  
that matters with PRESTIGE® vaccines  
including the most current  
equine influenza strain commercially  
available in Canada.<sup>1</sup>

PRESTIGE®  
The Next Generation of FLU Protection

PRESTIGE® 2

PRESTIGE® 4

PRESTIGE® 5

PRESTIGE® 5 + WNV

To help deliver meaningful protection, a vaccine needs to cover relevant equine influenza virus strains

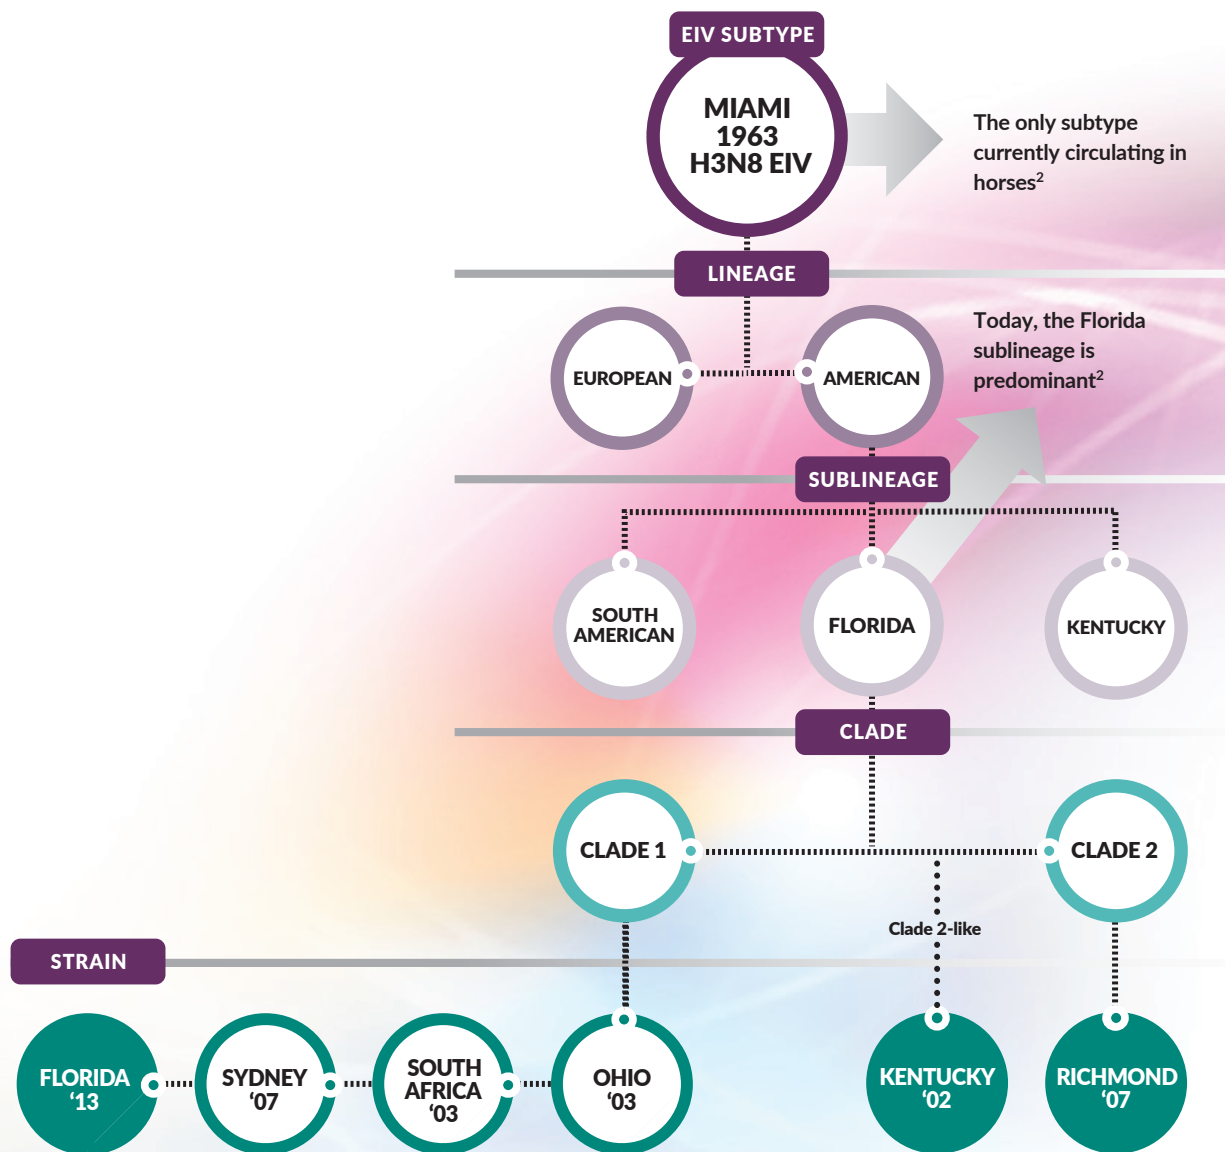

Figure adapted from Paillot 2014<sup>2</sup>

Helps deliver clinically relevant flu protection against both Clades:

✓ Florida '13 Clade 1

Based on a **highly pathogenic isolate** from the 2013 Ocala, Florida influenza outbreak. **Identified and isolated through the Merck Animal Health Equine Respiratory Biosurveillance Program.**

✓ Richmond '07 Clade 2

✓ Kentucky '02

All PRESTIGE<sup>®</sup> EIV-containing vaccines meet World Organisation for Animal Health (OIE) guidelines for Clade 1 and Clade 2 influenza coverage.<sup>3</sup>

Only PRESTIGE<sup>®</sup> vaccines include the Florida '13 EIV strain.

PRESTIGE<sup>®</sup> vaccines feature advanced technology you can rely on:

- Proprietary Antigen Purification System
  - Designed to minimize vaccine-associated adverse events related to the presence of extraneous protein and cellular debris
- Exclusive Havlogen<sup>®</sup> Adjuvant
  - To help offer high, long-lasting levels of protection and consistent potency in every dose
